JMU Classes	7/29/2025	Claremont JMU EXED 440: Classroom Management Class	8:00 am to 5:00 pm	Sidney Delepine
JMU Classes	7/30/2025	Claremont JMU EXED 440: Classroom Management Class	8:00 am to 5:00 pm Scan tools have long since been a necessity for diagnosing and repairing vehicles. Modern scan tools have advanced functions such as graphing and recording capabilities, that often go unused. Additionally, many technicians are not taking advantage of the ten OBD modes that exist on the generic side of their scan tool. Regulations for vehicles built from 2008 to present, require manufacturers to supply functions and data in a uniform and consistent layout in generic mode. In this class we will investigate the ten OBD modes of operation in your scan tool and how to use them effectively. We will also explore how to record and review scan data for solving diagnostic mysteries. After completing this class, a technician will be able to do the following: <ul style="list-style-type: none"> • Identify the ten OBD modes • Effectively use Freeze Frame information • Effectively use the generic data stream • Perform a VE calculation with one PID using generic data 	Sidney Delepine
Pre Sessions	7/21/2025 8:00:00	Claremont Unleash the Power of your scantool/Matt Donato	Diagnosing driveability and DTC concerns has become more complex despite the increased onboard diagnostic power in the last decade. DTCs are often misunderstood and OE diagnostic processes can be confusing and unhelpful. Scan data has grown from typically consisting of a few dozen PIDs, to literally hundreds of PIDs. After completing this class, technicians will: <ul style="list-style-type: none"> • Understand diagnostic codes and subcodes • More effectively select PIDs for specific driveability issues • Be more proficient diagnosing driveability concerns • Understand and diagnose VVT monitoring and coding • Quickly identify low power concerns using scan data • Work as a group through diagnostic studies from real vehicles 	Keith Lovegrove
Auto Technology	7/21/2025 13:00:00	Claremont Advanced Drivability Diagnostics/Matt Donato	8:30 am to 12:00 pm "Class Name: Multiple Methods for Multiple Intelligences The Multiple Methods for Multiple Intelligences course is designed to empower educators with the knowledge and skills to effectively cater to the diverse learning needs of their students. Based on the pioneering work of Howard Gardner and his theory of multiple intelligences, this course explores how each student possesses a unique set of intelligences that influence their learning preferences and strengths. You will delve into the principles of learning styles and gain an understanding of the theory of multiple intelligences. We will explore a wide range of teaching and learning strategies tailored to each intelligence, enabling you to create engaging and inclusive learning environments where all students can thrive."	Keith Lovegrove
Pre Sessions	7/23/2025 8:30 AM	Merimac Room Cosmetology: Multiple Methods for Multiple Intelligences from Mila		Marcia Bird

			Electronic chassis control systems can be difficult to understand and diagnose. This class is designed to help technicians become more successful in mastering these essential automotive technologies. Dive into the critical systems that ensure vehicle safety and performance and gain the skills to diagnose and repair advanced electronic chassis control systems. After attending this class, technicians will:

			1-2:30 PM: Tim Lawrence & Bob Jett, Facilitated by Tim Lawrence. Tim Lawrence began his CTE journey in 1967 as a CTE welding student in West Virginia. He worked in the manufacturing industry and later graduated Magna Cum Laude from James Madison University. Lawrence became an industrial education welding teacher in 1978 in Tazewell County, and was honored as the National Teacher of the Year in 1983. In 1987, he joined the Virginia Department of Education on contract as the state director for Virginia VICA. In 1996 Lawrence joined the National SkillsUSA Headquarters as the Director of Business and Industry Partnerships, managing the SkillsUSA Championships, fundraising with the SkillsUSA Foundation, leading the National Alumni Program, and serving as the Team Leader for Team USA at WorldSkills. Lawrence was named as the SkillsUSA National Executive Director in 2001. He served on the Manufacturing Skill Standards Council, and was a member of the Chief State School Officers Career Taskforce on a study of the Swiss Apprentices System. He represented the U.S. Department of State in Kazakhstan and as the USA Official Delegate for WorldSkills International. He received WorldSkills' highest honor in 2019 when he was named a WorldSkills International Fellow. Lawrence served on the National Assessment of CTE and the U.S. Department of Labor Job Corps Advisory Committee with the Secretary of Labor, both reporting to the US Congress. Tim retired from SkillsUSA in February 2020 and now works as a contractor and as the State Education Liaison for NCCER. In this role, he builds relationships and

Criminal Justice	7/24/2025 14:00:00 Eppington	Mock Hiring Process	Courtney Baker This dynamic session brings together construction industry professionals and CTE educators to strengthen the bridge between classroom learning and real-world application. Led by members of the Associated General Contractors of Virginia (AGCVA), including contractors actively shaping the workforce, the presentation will spotlight evolving construction methods, in-demand technologies, and the skills today's employers need most.	
			Instructors will hear directly from AGCVA members through presentations, hands-on demonstrations in a fabrication lab or jobsite (where available), and real-time conversations about how to better align curriculum with industry practices. Just as importantly, this session is designed to listen—to gain a deeper understanding of what CTE educators need and how the construction industry can meaningfully support their work.	
			Together, we'll explore practical, collaborative ways to empower students, strengthen programs, and build a talent pipeline that benefits everyone.

Jacquelin Morton IEC Chesapeake Electrical
Apprenticeship Program

For more than 40 years, IEC Chesapeake has been the region's leading electrical and renewable energy contractor association and electrical apprenticeship program provider. Our members are comprised of more than 250 contractors and associate partners, representing over 50,000 men and women in all facets of the electrical industry. Teaching hundreds of electrical apprentices and licensed electricians each year, and representing and advocating on behalf of our member companies, IEC Chesapeake is dedicated to educating, promoting and advancing the electrical industry.

Our primary mission is education, and our greatest relationship exists with our K-12 partnerships which create a natural pipeline from school to career!
